

Trashman-Begins

By the MisoHungry team

You can try out the game here: <http://www.tran2blogs.com/trashman/>

PLEASE PLAY THIS ON CHROME. OTHERS ARE SLIGHTLY NOT COMPATIBLE WITH THIS GAME. (IF YOU HAVE A TOUCHSCREEN LAPTOP, PLEASE USE TOUCHSCREEN FOR ALL THE BUTTONS).

DESCRIPTION:

This game will be mostly adventure and education genres. Adventure from exploring and educational from talking to NPC's who give the player actual data collected that has been collected by climate scientist for years. Another theme that is probably a little subtle is the sense of urgency. By including the time mechanic the player will get a sense that he or she has to hurry to achieve the best score. A problem in combating climate change right now is that we are running out of time. If we do not make rapid, progressive change, then time will run out. Mankind is getting closer and closer to the point of no return and by adding the time element to the game, the player will feel that pressure as well. The target audience is for people who know little about climate change but would like to know more. There will be facts that hopefully the player will find interesting and look more into how they can alter their behaviour and help make change in the real world.

CHEAT SHEET:

KEYS:

1. WASD to move around
2. SPACE BAR to attack/punch
3. P to pause
4. T to close NPC chatbox
5. CLICK NPC chatbox to go to next chatbox
6. ENTER to exit screens/to go next page

MAPS:

Tibbers Town:

West: Aohari City

East: Gobi Town

South: Antarctica Town

WALKTHROUGH:

1. You starts off at Tibbers Town. Talk to NPC (Alice) and she will tell you to head South to Antarctica Town.
2. You will travel through two maps before getting to Antarctica. Try to pick up trash and kill off enemies to get more points (trigger better ending). You will meet Miku at Antarctica Town and she will asks you to help her rescuing penguins. Talk to her after each level to get your reward (points) for every penguin you save.
3. You will then receive a TURBINE BLADE after you're done helping her and return to Tibbers Town. Talk to Alice and you will then asked to head West to Aohari Town.
4. After traveling through three maps, you will arrive at Aohari City. Talk to Reki and she will asks you to help her destroy the Corporation by meeting her North of Aohary City. You will then have to pass through 3 puzzles to get to the end stage where you destroy a machine by throwing trash at it. Talk to Reki afterward to get your rewards.
5. You will then return to Tibbers Town and receive your last mission of going East to Gobi Town and talk to Mimi there.
6. You will travel through three maps before getting to Gobi Town. Make sure to explore the map and talk to Ariel to get your Turbine Blades. When you arrived at Gobi Town, Mimi will welcome you and tell you to head North to fix the broken Turbine.
7. After fixing the Turbine, you will be sent back to headquarter and that is where your ending will trigger based on your performance.

ENDINGS:

1. Best ending: "You helped saving the world." This ending is quite hard to get, especially for first time players. You have to finish this game quickly within a short amount of times.
2. Okay ending: "You did your job.. nothing really changed though." Not hard to get.
3. Bad ending: "You did not help anything and the world is in bad shape... probably going to be destroyed." You can trigger this ending by going AFK or something. Even if you pass all the puzzles, you still can trigger this ending if you took too long.

HOW TO RUN GAME:

Project file are in the directory Trashman.

First thing is to go into the directory,

```
sudo npm install
```

This will install all the dependent packages for the project to work.

In the command line type (make sure you're inside the Trashman directory and you can see index.html file)

```
grunt connect
```

This will start a local server to host the project files on a web browser. Now open a web browser and type in localhost:8000 to see the game. If grunt isn't there use

```
sudo npm install grunt
```
